Presenter

NCSBN

- [Presenter] Every day you go about your business, take care of your family, live your life. Until one day and a moment when you need a nurse.

At NCSBN, your moment is our mission. We protect the public and the trust in nursing. We are the global leader in nursing regulation through policy, data and Innovation. Our NCLEX is the world's premier exam that better measures clinical judgment, so nurses are ready on day one.

Our Nursys system is the only National nurse database for verifying and monitoring nurse licenses and to identify them across systems and protect their personal information.

Our groundbreaking research can be found in the Journal of Nursing Regulation. It's this data that leads to policy. We are the collective voice of nursing regulation. We advocate for a stronger workforce through greater nurse mobility and nurses practicing to the full extent of their education and ability.

It's all part of leading regulatory excellence. The moment between a nurse and a patient should be one of trust and comfort. That's why we work every day for your one day. Because at NCSBN, your moment is our mission.

NCSBN leading regulatory excellence.
